

MV “THORSHØVDI” *current name “ANTARCTIC SEA”*

NORWAY`S LARGEST FISHING VESSEL / FLOATING KRILL FACTORY

NEW TYPE OF VESSEL FOR KRILL HARVESTING AND PROCESSING.

Purpose designed for krill fishing in icy Antarctic waters. Built with ice-strengthened double hull for extra safety. Fitted with equipment for fishing and onboard production in areas with limited logistic support or facilities.

The trawler / production ship MV “Thorshøvdi” is specialized for krill production and equipped with proprietary and unique ship design for krill harvesting and product processing.

The size and strength of the MV “Thorshøvdi” reflects the harsh Antartic conditions and operation outside normal logistics and support availability.

MAIN DATA

Lenght O.A	:	133,88 m
Breadth moulded	:	19,87 m
Depth to main deck	:	9,65 m
Draft moulded	:	7,05 m
Gross Tonnage	:	9432 tons
Net tonnage	:	4316 tons
Crew Max.	:	51 persons
Main engine	:	Stork Wärtsila, 5380 HP. IFO 380 and MGO
Class:	:	BV I + Hull + Mach. Fishing vessel, ICE 1A +AUT- UMS, + SYS- NEQ-1, MON-SHAFT.
